Prologue

Imagine you are being tasked or 'inspired' to 'develop' a new name for the Christian deity. What would be the conditions?

- Are you entitled because you lived in a specific time period, or would someone living today be entitled to coin a new name?
- Are you entitled because you live(d) in a specific region?
- Are you entitled to come up with a new name because you speak or maybe even helped to create a language different from that of the Bible?
- Are you entitled because your nation is used to specific spiritual entities and you don't want to 'confuse' them with the biblical title(s) which they might have never heard?
- Are you entitled because you hold an extra-biblical rank such as bishop or labour as a Bible translator?
- Would you be entitled if you would hold a biblical office such as presbyter or carry the original office of apostleship?
- Or because you belong to a specific denomination?
- Does any of those specifics bring you or anyone else in the past or present into the position of calling out a new name for Him?

The answer to all those questions is most certainly a resounding 'No'. After the Bible was finished by the end of the 1st / latest beginning of the 2nd c. AD, no one -was-, -is-, or -will be- able to add a new name for the Christian deity.

Yet this has been done at least dozens of times since, as we will find out in the next hour or so. You will not understand everything in this study as it is required by the nature of linguistics, to dive into details neither the author of this study would have thought possible to touch prior to being led to this study. But even a superficial reading, without understanding the more intricate details, will quickly lead you to a deep conviction that something went fundamentally wrong in the course of history and requires -at least- your personal attention, and probably correction.

WHAT WILL THIS STUDY REVEAL?

1. THE NAME 'G-D' (GUÞ) WAS COINED BY ONE PERSON, BY WULFILA (= LITTLE WOLF). HE PRECISELY INTRODUCED IT THROUGH HIS GOTHIC BIBLE TRANSLATION (CODEX ARGENTUS = SILVER BIBLE).

2. WULFILA, WAS A ROMAN CATHOLIC BISHOP & (SEMI-) ARIAN (BOTH -SIMULTANEOUSLY- UNTIL HIS DEATH), CONFESSOR OF THE FAITH, PONTIFEX & PRIMAS, WORSHIPPED EXPLICITLY THE 'QUEEN' (OF HEAVEN, MARY), REJECTED THE DIVINITY OF THE HOLY SPIRIT AND THE DEITY OF CHRISTOS, AND MANIPULATED PARTS OF THE BIBLE. HE E.G. SUBDIVIDED THE WORD 'HIGH PRIEST' INTO 6 ADDITIONAL TITLES, WHICH FACILITATED TODAY'S HIERARCHY.

3. THE ENGLISH WORD 'G-D' COMES FROM THE GOTHIC '𐍅𐌿𐌸' (GUÞ). THE NUMERICAL VALUES BEHIND GUÞ ARE IDENTICAL WITH THE GREEK ALPHABET WULFILA MAINLY USED, AND REVEAL '𐍅𐌿𐌸' (GUÞ) TO BE -SYNONYMOUS- WITH THE NAME 'GOTH', THE TRIBE WULFILA BELONGED TO! IN ANCIENT GREEK, A 'GOTH' IS A 'GOTTHOS', WHILE THE GERMAN WORD FOR 'G-D' IS 'G-TT'.

4. THE TERM '𐍅𐌿𐌸' (GUÞ) HAD ORIGINALLY A NEUTRAL GENDER AND WAS USED IN THE PLURAL. GOTHIC RELIGION WAS PURELY TRIBAL IN WHICH POLY-THEISM, NATURE WORSHIP, AND ANCESTOR WORSHIP WERE ONE AND THE SAME. AFTER WULFILA BECAME A ROMAN CATHOLIC AND LATER ALSO (SEMI-) ARIAN, HE 'DESIGNATED' ITS USAGE TO BE MASCULINE AND SINGULAR.

5. THE INDIVIDUAL LETTERS OF 'GUÞ' MEAN IN THE RUNIC ALPHABET WHICH WULFILAS PARTLY USED: GIFT [OF] WILD OX [TO THE] THURS GIANTS / TH*R G-D (IN THIS ORDER!), WHICH POSSIBLY POINTS TO A COMPOUND MEANING.

6. A 'GOTHI' WAS A PAGAN PRIEST. THE NORSE G-D OF THUNDER 'TH*R', WHICH IS ALSO AN OFFICIAL MEANING OF THE THIRD LETTER OF GUÞ, WAS TRADITIONALLY DESCRIBED AS HAVING BEEN SUCH A GOTHI!

7. THE NAME 'G-D' IS USED TODAY OUTSIDE OF CHRISTIANITY AND JUDAISM!

8. THE NAME OF THE TRIBE OF THE 'OSTROGOTHS' MEANS LITERALLY "GOTHS OF THE RISING SUN" OR "GOTHS GLORIFIED BY THE RISING SUN"!

9. THE TERM 'GOTHIC' STANDS STILL TODAY FOR WORKS OF DARKNESS.

10. THE CATHOLIC TEACHER J.R.R. TOLKIEN MADE GOTHIC THE LANGUAGE OF HIS CHOICE AND WAS IN TURN INSPIRED TO INVENT 12 NEW LANGUAGES.

Intro-duction	The name 'G-d' is not even closely related to any biblical inspiration and is · **Not found in Scripture**, neither in Paleo-Hebrew, nor Aramaic, nor Greek, nor in Modern Hebrew, · **Not a single manuscript or any of the mega-codices** (Codex Alexandrinus / Sinaiticus / Vaticanus et al; all written in Greek) does include it, · **No apostle or early church 'father'** (no legitimization of the term 'fathers', see Mat 23:9 which strictly forbids that term being used in that precise sense) ever mentioned it before the 4c. AD (= 4th century after CHRISTOS), · **No prophet or teacher of the Word** received a special revelation authorizing its use . . .	-
	. . . but suddenly after thousands of years a new name was brought up and is to our surprise as widely spread today as it could be.	
	To make matters worse, the term 'G-d' may now signify any monotheistic conception of G-d, including the translations of the **Arabic All*h, Indic Ish**ra, Maasai N**i and Persian Kh**a (▾ see next page ▾)**. Should we not ponder why even religions such as Roman Catholicism are perfectly comfortable using this particular name, while strictly avoiding the names 'THEOS' and 'KYRIOS', and even **employing directives against the use of the Tetragrammaton 'יהוה' - 'YHWH'** (without vowels; only used in the Old Testament)?	*Wikipedia.org /God_(Word)* *Discernment of Roman Catholicism*
	The teaching that **all ways lead to 'G-d'** is in stark contrast to ...	"All religions are paths to reach G-d ... They are like different languages in order to arrive at G-d, but G-d is G-d for everyone ... Since G-d is G-d for all, then we are all children of G-d ... There is only one G-d, and each of us has a language to reach G-d. Some are Sikh, some Muslim, Hindu, Christian. And they are all paths to G-d." — Pope Francis in 2024, at the Interfaith Youth Gathering in Singapore
	... the Bible which states in 1Cor 8:4-6 that **there is only one THEOS** and that no other way, name or idol leads to THEOS. See also Deu 4:35; Deu 6:4; Deu 32:39; 2Sam 7:22; 1Kin 8:60; Isa 44:6; Isa 45:5, 6, 14, 18, 21, 22; Isa 46:9.	*"... we have known that an idol is nothing in the world, and that there is no other THEOS except one; for even if there are those called gods, whether in heaven, whether upon earth — as there are many gods and many lords — yet to us is one THEOS, the FATHER, of whom are all things, and we to Him; and one KYRIOS, IESOUS CHRISTOS, through whom are all, and we through Him."* — *1Cor 8:4-6*
	The Bible more importantly states that we should not remember (or call to mind) other theoi (gods); nor even speak their name with our mouth. For this reason and contrary to common custom, the names of other theoi (gods) are blurred in this study through the use of '*' (asterisks, e.g. Al**h) or '-' (hyphen, e.g. 'G-d'). This might appear overzealous at first, but should be the norm amongst Bible teachers, when we take serious the Bible passages clearly forbidding its use. Just because THEOS Himself takes the freedom in His Word to mention many names as explicit warning, does not grant us the same right. We are not in the position of THEOS. Its use -might eventually- be acceptable when used as warning, but certainly not in the laissez-faire style we see today and habitually consider to be academic.	*"There will not be to you other* [ETEPOC, heteros, another of a different kind] *theoi* [gods] *besides me."* — *Exo 20:3* *"... And a name of other theoi* [gods] *you will not remember* [Strong's Greek G363, ANAMIMNHCKω, anamimnesko, From G303 ('ana' = again) and G3403 ('mimnesko' = remember); to remind, recollect, call to mind, (bring to, call to) remember (-brance)]*; it is not heard from your mouth."* — *Exo 23:13*
	Let us now look at some of the idols found in plain sight in today's -'Christian'- Bible translations:

	בראשית היה הדבר והדבר היה את האלהים ואלהים	HEB Bible	Elohim אלוהים	'ELOI' means according to Mar 15:34 'MY EL' and is probably a compound of the possessive pronoun 'I > My' (in conformity with the 'I AM') in the masculine plural (IESOUS speaking here to the FATHER and the HOLY SPIRIT) and the word 'EL . .' for deity. I (1Sg) My Singular: Mas ΕΜΟϹ; Fem ΕΜΗ; Neu ΕΜΟΝ Plural: Mas ΕΜΟΙ; Fem ΕΜΑΙ; Neu ΕΜΑ Most remarkably, 'ELOI' is also found in the word angel / messenger, which is a compound of 'ΑΓΓ-ΕΛΟΙ', transliterated 'agg-eloi' = 'Messenger of ELOI'. This word on the other hand is found in 'Evangelium', Greek 'ΕΥ-ΑΓΓ-ΕΛΙΟΝ', transliterated 'eu-agg-elion' = 'Good Message of (My) ELOI'. Singular / Plural Nominative: Ο ΑΓΓΕΛΟϹ, ho agg-elos / ΟΙ ΑΓΓΕΛΟΙ, hoi agg-eloi Genitive: ΤΟΥ ΑΓΓ-ΕΛΟΥ, tou agg-elou / ΤΩΝ ΑΓΓ-ΕΛΩΝ, ton agg-elon Dative: ΤΩΙ ΑΓΓ-ΕΛΩ, toi agg-elo / ΤΟΙϹ ΑΓΓ-ΕΛΟΙϹ, tois agg-elois Accusative: ΤΟΝ ΑΓΓ-ΕΛΟΝ, ton agg-elon / ΤΟΥϹ ΑΓΓ-ΕΛΟΥϹ, tous agg-elous But the longer ending of 'El-ohim' is unclear, and it is also unclear if this name appeared in manuscripts before the manipulated Proto-Masoretic text in ~170 AD. The Divine Name In The 1-2c. AD

Through the previous table it should have become clear to the reader that our self-declared 'right' / 'creative license' to randomly translate the divine name, has led to partly abstruse and heretical translations, because those names are most often borrowed from pre-existing gods of the respective region or country. Those adaptions sadly have affected- and still affect billions of believers.

But when we look back at the century when CHRISTOS came as the man IESOUS, we find writers such as Josephus (~37 - 100 AD; a Jewish Historian; who was writing from Rome!) still using the name 'THEOS' in its original form more than 1300x in his work 'Antiquitates Judaicae' (originally written in Greek) alone.

Greek Old Testament
Antiquitates Judaicae

Justin Martyr (~100 - 165 AD; Apologist; also writing from Rome!) used in his works:

595x THEOS
(Singular, 289x ΘΕΟϹ nominative, 306x ΘΕΟΥ genitive; excluding 42 plural forms of ΘΕΟΙ, ΘΕΩΝ and ΘΕΟ) and

304x KYRIOS
(ΚΥΡΙΟϹ, ΚΥΡΙΟΥ or ΚΥΡΙΕ including the use as 'master', excluding 3 plural forms of ΚΥΡΙΩΝ).

Where Did The Name 'G-d' First Appear?

The first documented appearance of the word behind 'G-d' did occur in the Codex Argentus.

Codex Argenteus (a copy of Wulfila's translation; meaning 'Silver Bible; of Byzantine text-type; 172 MB download in ePaperArchive)

See Matthew 5:34 (page 164, 161) with the mention of 'raz' (guþ), *nomina sacra of* 'raþ' (guþ), *direct precursor to* 'G-d'.

*Codex Argenteus - OCR scan, searchable, with latin translation. CP.MBE**

** Original file: 'Ulfilas - Fragments of the Gothic version of the Old and New Testaments, which survive, according to the codex, edited, Latinized, and provided with critical annotations, with a glossary, and grammar of the Gothic language. By Hans Conon von der Gabelentz*

The person who introduced this title to Arianism / Gothic 'Christianity' (which is not true Christianity), was bishop Wulfila (Ulfilas), the creator of the Gothic (Proto-Germanic) alphabet and of a Bible written in that language, containing the first mention of the name 'G-d' as shown in the previous image.

Some argue that Wulfila did not 'invent' the word. The designation 'Goth' (for his tribe) preceded indeed his time (in oral form), but even if it would have been written down earlier, it would have unquestionably been through Runic letters, which resulted in an essentially different writing of the word (see the comparison of the alphabets below). He therefore clearly -coined- the word, both in its Gothic form as language (which he at least formalized and coined) and as unique precursor for the name 'G-d' as known today. In short, without Wulfila, the word 'G-d' would definitely not be in use nor in existence today.

Discernment On Wulfila

When we employ proper spiritual discernment on Wulfila, we notice that:

1. Wulfila worshipped the Queen (of heaven), as explicitly stated in the obituary written by his foster son Auxentius of Durostorum (who became bishop of Milan):

   "Following this and similar doctrines for 40 years flourishing splendidly in the bishopric through apostolic grace, he preached in the Greek, Latin, and Gothic tongues without ceasing in the catholic church of Christ, because the Church of the Living G-d is one, the pillar and column of Truth; and he affirmed and witnessed that the flock of Christ, our Lord and G-d, was one, one the worship and one the house; one the Virgin, and one Spouse, one the Queen (Latin text of the letter: "unam reginam" accusative singular of regina, meaning queen, princess; unique identifier for the "Regina Cæli", the Queen of heaven (Mary) worshipped in the Catholic Church and Eastern Orthodoxy); that there was only one vine, temple, congregation of the Christians; that all other places of congregation were not churches of G-d, but synagogues of satan."

   > It is crystal clear from the context, that this 'reginam' cannot refer to an earthly queen Wulfila would have been subjected to. This statement therefore makes Wulfila (and his foster-son) false teachers of the worst kind. But in all the books and papers about Wulfila (e.g. by Presbyterians like Charles Anderson Scott or German Lutherans such as Georg Waitz who blindly adore him as super-saint and in the case of Waitz employe a very strong patriotism), this striking passage is -NEVER- being addressed, although the letter is always given utmost priority and credibility, and although much energy is invested in the question if Wulfila was now more Catholic or more Arian in his beliefs!

   [1] [2] [3] [4] [5] [6]

2. His name was literally 'Little Wolf' (ƿulfila - *wulfila, a male given name, Wulfila, "Little Wolf"; cf. German: "Wölflein") and his official seal even carried a handle with a wolf depiction. Sadly many -if not most- writers and historians eliminate the "l" from his name (for obvious reasons; Philostorgius uses: 'Oulphilas', Socrates / Sozomen / Theodoret: 'Oulphilas', Auxentius: 'Ulfila', Cassiodorus-Iordanes: 'Ulfilla'), although the original Gothic writing 'ƿulfila' (*ulfila) clearly includes the additional letter before the 'U' (which is both transliterated and pronounced as 'W').

   > We do not require much Bible knowledge to know the implications of this name in a spiritual context. While a Christian should not judge anyone by his or her name, it would on the other hand be an oddity that our Creator would precisely chose someone with this name to be the provider of His -new- name. It is impossible to picture this (author's) name in a constructive context in the Bible.

   [1] [2] [3] [4] [5] [6] [7] [8] [9]

3. Wulfila manipulated the Bible: *"Despite its strong dependence on the original Greek source,* (Wulfila) *embodied the ideas of the Danubian Goths"* [3]. Instead of translating Phil 2:5 with *"For let this mind be in you, which also is CHRISTOS* (JESOUS, *who, being in the form of THEOS, thought it not robbery ... to be equal to THEOS"* (Strong's G2248 isos), he translated *"... wisan sik galeiko guda"*, meaning *"... to be similar to / like G-d"*.

   [1] [2] [3]

4. Another manipulation of the Bible reflects his Arian faith (although watered down by some scholars to a minor variation). Instead of translating Php 2:5 with *"For let this mind be in you, which also is CHRISTOS* (JESOUS, *who, being in the form of THEOS, thought it not robbery ... to be equal to THEOS"* (Strong's G2248 isos), he translated *"... wisan sik galeiko guda"*, meaning *"... to be similar to / like G-d"*.

   [1] [2] [3]

5. The longer ending of Mark 16:9-20 (see 'Interpolated Bible Verses' #6) is not only found in the Gothic Bible, it could indeed be the very first Bible to have included it (!). Wulfila wrote his translation in between 350-369 AD (copied much later into the Silver Bible which attests the longer ending), meaning it antedated Jerome's Latin Vulgate (405 AD, which also included it) and was considered of greater authority and legitimacy than the Vulgate. Do have no knowledge of any other manuscript which antedated the Gothic Bible and included the longer ending of Mark 16.

   [1] [2] [3] [4] [5] [6] [7]

6. While the Christian Bible always uses the exact same name word 'ΑΡΧΙΕΡΕΥϹ' [Strong's G7490, archiereus] for what is translated with 'chief / high priest(s), the Gothic Bible uses 7 (!) different renderings for that same office.

   "There is no doubt that much of the variation is a consequence of exegetical and creative inputs on the part of the Gothic translator [...] exercises his theological and literary acumen, demonstrating personal involvement and particular linguistic ingenuity ..." [1]"

   In detail, Wulfila (and his helpers), translated the word 'ΑΡΧΙΕΡΕΥϹ' only 1x correctly with 'ufargudja' (= high priest), he 12x downgraded this title to 'gudja' (priest only), he 13x embellished this title as assume in the following chart (derived from pagan terminology / specific offices found in Gothic religions, and/or with the specific aim to facilitate a vast diversity leading to Roman Catholic 'bishops = archbishops = major archbishops, cardinals, metropolitans, patriarchs and popes'), and 1x deleted the word 'priest' entirely while using 'auhumists weihs' (= supreme holy (master) for Caiaphas in Joh 18:13. The same Caiaphas he calls just a few verses later in Joh 18:24 'maista gudja' (same Greek word).

   In the chapter of John 18 alone, he uses the whole array of 7 different titles, although the Bible constantly uses the same word, either in the singular as the high priest (9x) or in the plural as chief priests (2x).

Review of 'The Apostolic Fathers' including the letters assigned to Ignatius of Antioch

In summary, Wulfila blurred the distinction btw. high priests and priests while inventing 6 different names, some of those being 'innocent' adjectives while many of those could point to new offices. After the (retroactively manipulated or wholly impersonated) Letter of Ignatius to the Philadelphians, he laid the groundwork for the Roman Catholic hierarchy (it proposed 1. Bishop = G-d, 2. Presbyters = Apostles, 3. Deacons = Servants), Wulfila now actively facilitated the creation of a whole plethora of new offices (although he used different names and adjectives difficult to correlate to a specific office. It is probably also not a coincidence that the election of the first Pope of the See of Rome (366 AD) and Wulfila's translation (350-369 AD) coincide in timing.

7. He had originally held the -faith- in full accordance with the Roman (Catholic) church (see #4; as it is widely agreed upon; see also separate discernment about the RCC) , and was made a 'Confessor of the Faith'. After he transitioned into Arianism / Homoianism, he never renounced Catholicism, nor had he been excommunicated by the Catholic church, which is highly unusual for those days, when a different religion usually caused drastic measures (Arians were at times and in certain countries by Catholics even considered worse than pagans; cardinals and their priests were exiled, but on the other hand it is an error of chronology and misleading to place the division between 'Arians' and 'Nicenes' too early in the 4c. AD (5)). He remained closely connected to Catholics until his death and went as far as to attend several councils organized by the (by Catholics) orthodox Church. He was also called Pontifex and Primas ('Pontifex Ispeque Primas Vulfa', which is a title closely as-sociated with the Roman Pope). Catholic writers such as Socrates and Sozomenus remembered him with honor.

   [1] [2] [3] [4] [5] [6] [7] [8] [9] [10] [11] [12]

8. Eusebius of Nicomedia, who was brought up predominantly in Origen's teachings (see separate discernment), showed his great influence by bringing Wulfila into the Arian / Roman Catholic priesthood (shortly before Eusebius' death in 341 AD). Eusebius was on the one hand close to Catholicism and is even venerated in the Roman Catholic Church, because he pieced together the 'Apostolic Succession' from the Apostle Peter to the first Pope of Rome, and even 'baptized' in 337 AD the Roman Emperor Constantine who made significantly pro-Christian Catholicism. On the other hand, Eusebius was the primary supporter of Arius and embraced the false teaching of Arianism while studying in Antioch. After Eusebius had baptized Constantine, his son Constantius II also followed Arianism and -literally closing the vicious circle- even installed Eusebius as Constantinople's bishop (which is modern Istanbul, and was so to say the former Rome / power centre of organized Roman / Orthodox Christianity'). The later Roman Emperor Valens continued to spread the false teaching of Arianism, who in turn brought it to the Goths.

9. The fact that Wulfila became a bishop, in itself disqualifies him already from any spiritual authority. Any person who places himself in the seat of CHRISTOS as the only head of the church, is an abomination to the Word of TEHOS, which considers only Overseers and Deacons as valid positions within the church (no matter how undiscerned and even normalized this office is by many, if not most of today's scholars). The famous opening of the Creed of Antioch (341 AD; the council where Wulfila was probably baptized) declared: *"We believe neither become followers of Arius [the founder of Arianism] – for how should we who are bishops follow a presbyter?"*

   [1] [2] [3] [4] [5]

10. Constantius II the Roman emperor from 337 – 361 AD, held Wulfila in such high honour, that he described him repeatedly as the era's Moses (he was also compared to the prophet Elijah, with authors such as Auxentius (foster-son of Wulfila and bishop of Milan) and or the Presbyterian Charles Anderson Scott claiming that he was taken up into heaven before a great crowd in Constantinople / Istanbul after he had died ...).

    > While we are used to myths and legends from Ancient History, we are rather surprised to find such primitive and naive legends of super-saints ascending into heaven being repeated in relatively modern scholarship.

    [1] [2]

11. Jerome's (Secretary of the Roman Pope Damasus) 'Commentary on Isaiah' contained also a copy of Wulfila's Bible translation, affirming once again that the Roman Catholic Church highly respected and promoted Wulfila.

    [1] [2]

12. Wulfila inspired the highly problematic and ultra-conservative Roman Catholic teacher J.R.R. Tolkien (lord of the Rings) to study Gothic as his first foreign language (!), which in turn motivated him to invent 12 own languages, and to even change his signature to Rogiwualinu Dwalalósnets (gothicized 'Ronald Tolkien'). In Tolkien's and J. K. Rowling's works of darkness (which is obviously not seen as such even by many professing Christians) we find also a strong focus on Runic letters which are also part of Wulfilas predominantly Greek alphabet (the famous Nazi insignia consisted also of Runes!).

    [1] [2] [3] [4] [5]

13. While we have usually many documents and letters from important Christians preceding and following the time of Wulfila, we know today that the vast majority of Wulfila works were 'lost' and forgotten, with near complete annihilation for this (he wrote several treatises and translations in Gothic, Greek and Latin). We only know from Spain that Arian literature had been collected in 589 AD (in the year the Visigoths converted to Catholicism) and burned together with the house in which these were heaped up, and thus not a single Gothic text has survived in Spain. Jerome also excluded him from his collection 'De Viris Illustribus (On Illustrious Men)' with biographies of 135 important figures, which is clearly intentional given Wulfila's enormous importance and Jerome's previous inclusion of Wulfila's translations. This rather points to an intentional removal of his works, which could eventually go hand-in-hand with his mysterious death -at- the Council of Constantinople.

    [1] [2]

14. [Arianism] Wulfila (as well as his successor, the Gotho-Phrygian bishop Selenas) opposed Trinitarian Christianity, denied both the deity and the divinity of the HOLY SPIRIT, and reduced the HOLY SPIRIT to a minister of created by CHRISTOS. He taught that the SPIRIT's actions are common to THEOS, but that these actions are no proof of His divinity (meaning He is not divine in his eyes). Even more problematically, he taught that CHRISTOS is created, but not deity. Wulfila was therefore clearly a false teacher, sadly having been polluted by the Roman Emperor Valens, who sent them teachers of Arius's dogma. The Goths clung to the rudiments of this teaching, the first faith they had received and later disseminated by Wulfila.

15. For a complete discernment of Wulfila and the respective sources: www.fitforfaith.ca/discernment-historical-figures/

    [1]

Knowing that Wulfila was closely connected to Arianism and the Roman Catholic Church (he opposed it only to the degree the Catholic Church conflicted with Arianism / Homoianism, but had generally close ties with them) and His explicit denial of the deity of CHRISTOS and of the divinity of the HOLY SPIRIT should make us already seriously question the legitimacy of his man-made designation 'G-d' for our CREATOR!

But the problem is much greater than Wulfila, and his particular associations and doctrines:

7 · Meaning Of The Name 'G-d'

Comments

What Does The Term 'G-d ' Mean?

Now we come to the decisive point: The word 'guþ' = 'G-d' is synonymous with the word 'Goth' itself!

We gain this most important knowledge by comparing the letters of the Gothic Alphabet with those of the Greek Alphabet on which Wulfila's language is mainly based upon. Most of the letters of the Gothic alphabet have been taken over directly from the Greek alphabet (e.g. Ebbinghaus went as far as to affirm the Greek script as the -sole- model for the Gothic alphabet), though a few have been created or modified from Runes (the Gothic alphabet replaced Runes).

Wulfila did thankfully not change the Greek Numeric Values and adopted exactly the same Gothic Numeric Values. This Greek equivalent to the Gothic Numeric Values reveals '𐍃𐌿𐌸' (guþ; the original term for G-d) to be synonymous with 'Goth'.

The Four-Fold Proof Of Equivalence

Comments	References

Another proof is the former Middle English use of the third letter of the Word G-d / Goth, also called the Thorn' Letter 'Þ' as to commonly express 'th'. The King James Version used in 1611 AD the word 'Þe' (printed as 'ye' because not all printers supported the special letter 'Þ') for 'the' in places such as Job 1:9, John 15:1, and Romans 15:29. It also used 'Þt / yt' as an abbreviation for 'that' in places such as 2Cor 13:7. All were replaced in later printings by 'the' or 'that', respectively, after the digraph 'th' reappeared, gradually superseding these letters in Middle English.

This constitutes the four-fold proof that the term which Wulfila chose for the Christian deity, the name G-d, is identical with 'Goth' (the German linguist Jacob Grimm also supported this concept). It is clear that there is no justification in using this title, which even includes a three-pronged spear ⱳ for THEOS. This title, previously used exclusively to describe a tribe, should have never found its way into the Christian Bible and into the vernacular use.

THE EQUIVALENCE OF 'G-D' WITH 'GOTH'

8 · Meaning Of The Name 'G-d'

Comments	References

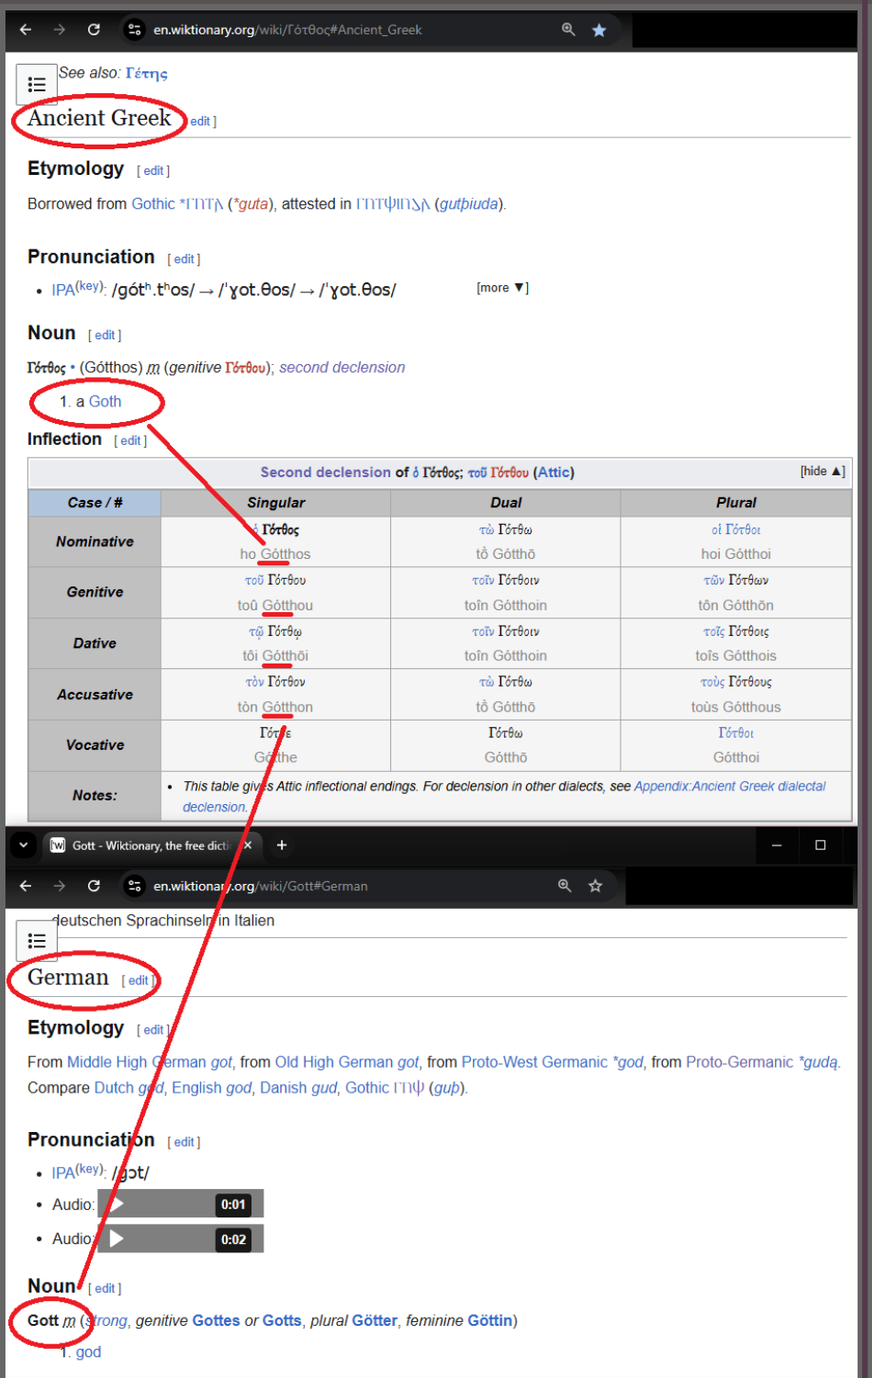

Equivalence Of The German Designation

When we look at the German term for 'G-d', which is 'G-tt', and compare it with the Greek declension of the term 'Goth', the accordance becomes even more obvious.

- At this point we have to ask ourselves if mainstream scholarship really did not see this obvious accordance for more than 1000 years, or if we had been intentionally deceived.

  The truth is probably found somewhere in between, with some scholars having noticed this obvious accordance, but having either lacked spiritual boldness or feared a negative impact on Christianity. Other motives could be due to the tremendous pressures within their communities when it comes to relatively uniform theology, the inability to later break free from teachings absorbed in universities, or because of the risk of losing job / financial security / grant money / professional admiration.

  But it should be obvious that it is far more problematic when millions of believers use a totally wrong name for their daily prayers and in their spiritual journey, than some unbelievers potentially being hindered from becoming Christians.

Meanwhile, we find in the English (G-d) and German (G-tt) articles on Wikipedia some 'adventurous' assumptions about the etymology of this term, often done with good intentions, but missing the very obvious and much rather distracting and confusing the reader.

9 · Adaptation Of The Name 'Goth'

Former Use And Adaptation Of 'Goth'

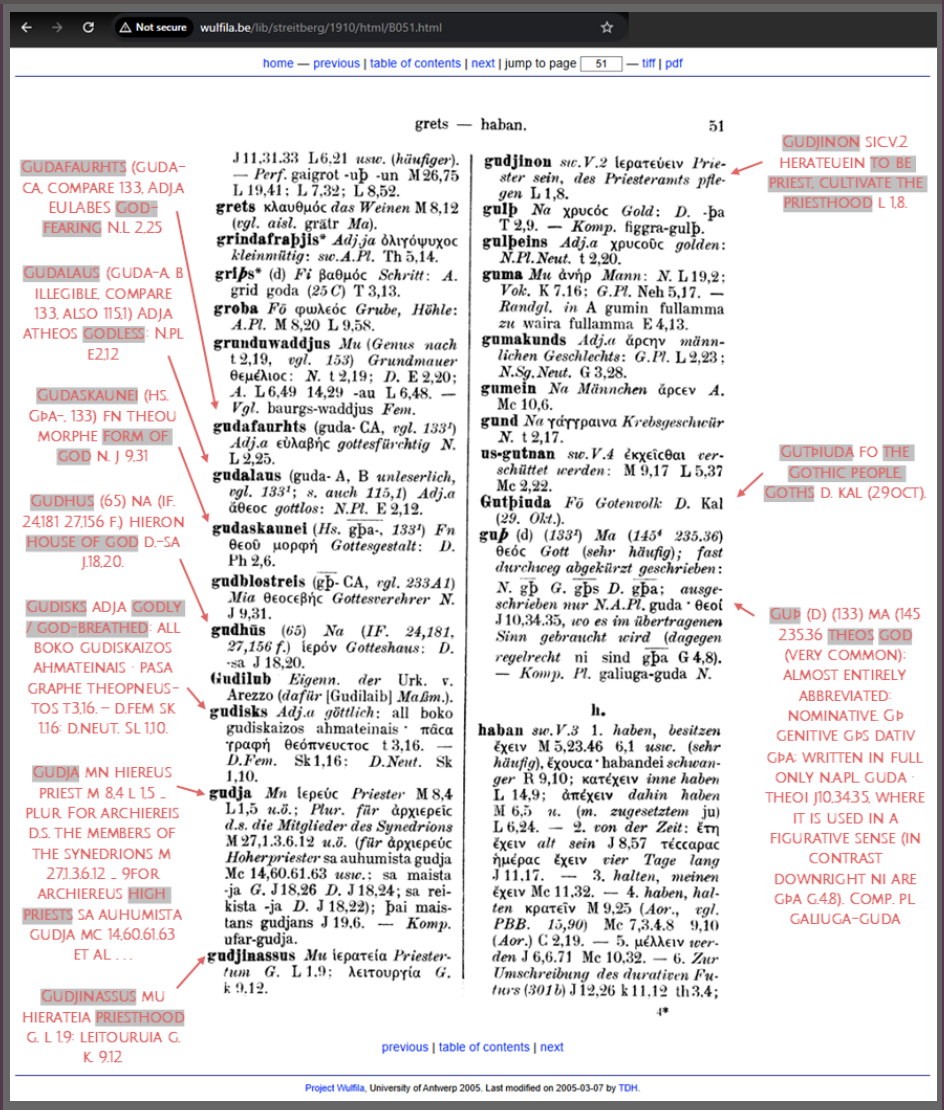

The word and its cognates were initially neutral, which makes it clear that this name does not have any spiritual or divine authority. Only when their speakers, the Goths converted to ~Christianity~, the word was adapted by them to be personal and masculine (while the neuter endured!).

Wikipedia.org /God (word) #Influence of Christianity

The Name of G-d in Gothic, by A. T. Hatto

The word likely had a general, predominantly plural or collective sense prior to its adaptation to ~Christianity~.

After its conversion, the word was commonly used in the singular to refer to the Christian deity, and also took on characteristics of a name:

Digital facsimile of Wilhelm Streitberg's 1910 Gothic dictio-nary, Translation by Thomas Lorenz (mother tongue German)

A 'Gothi' (or goði; plural goðar, fem. gyðja; Old Norse: guþi) was a position identical or similar to a pagan priest (mostly male; inherited; usually one priest for each of the g-ds).

Wikipedia.org /Gothi

Remarkably, the Norse g-d 'Th*r' (the weekday Thursday derives from this g-d of thunder 'Th*r'; see also the Norwegian 'T*rsdag, German 'Donnerstag' = day of thunder) was also described in the Ynglinga saga as having been such a Gothi! (While the third letter of G-d / Goth is literally called the 'Thorn' letter which could be a coincidence or more probably not).

Inscriptions in Denmark, Iceland and Norway show the office to be opposed to magic, but those priests were to offer up sacrifices (blót), and in times of war sacrifices were made to images of O**n. The title disappeared in Iceland after 1000 AD, when the Christian conversion occurred. So why was one title not suitable anymore, but another title (which is G-th' with one letter less) is still so today in the eyes of many people?

Wikipedia.org /Odin #Viking Age to post-Viking Age

We find strong connotations of a divine application of the term 'Goth' in culture. In Spain, a man acting with arrogance would be said to be *"haciéndose los godos"* ("making himself to act like the Goths / act like the gods").

Wikipedia.org /Goths #Legacy

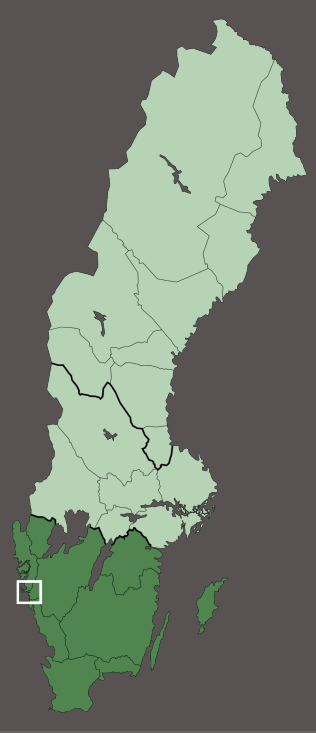

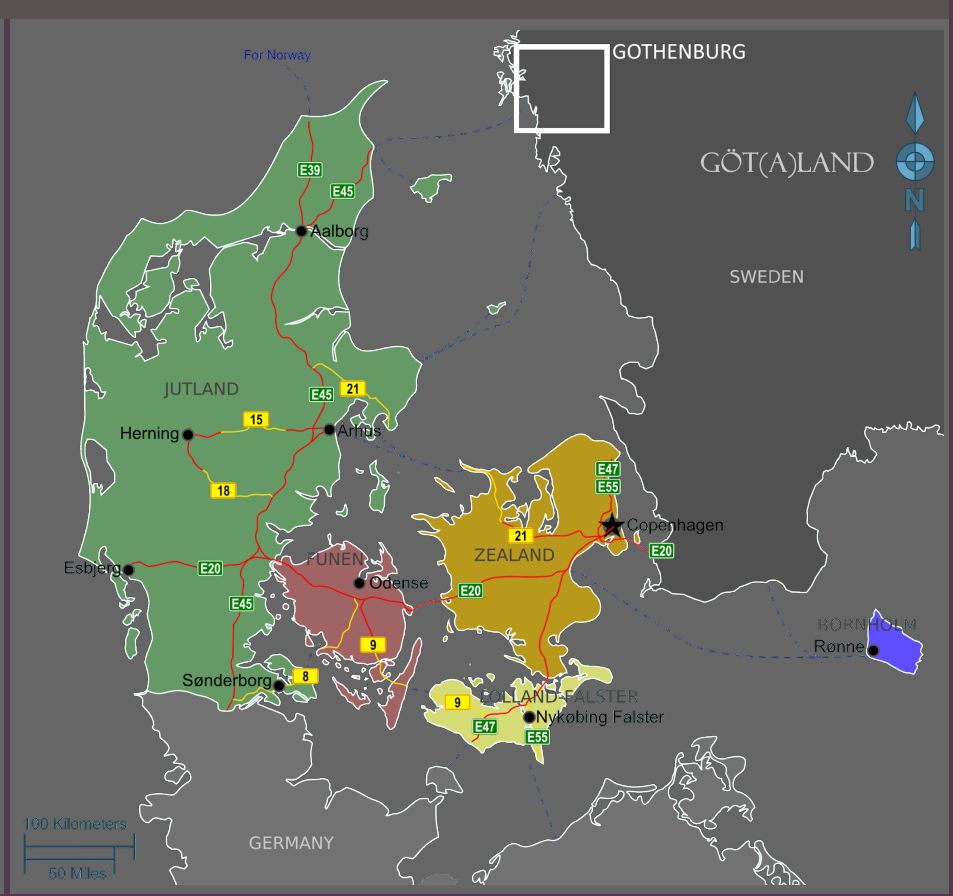

Ostrogoths (one of the two great Gothic kingdoms within the Western Roman Empire) means 'Goths of the rising sun' or 'Goths glorified by the rising sun' (see 'History of the Goths by Wolfram Herwig)!!! Here we find a literal use of a 'Little gods theology' blatantly assigned to an entire tribe of peoples, who considered themselves as very special because of the spiritual origin of 'Goth', and had also been considered so by many others, as we notice over and over when reading through the historical accounts.

Wikipedia.org /Ostrogoths #Etymology

While we are not aware what spiritual entity or entities the term 'G-th' exactly refers to prior to its use by Arian / Gothic ~Christianity~, we unmistakably see an unholy awe about all those individuals and tribes carrying, and many others being keen to admire or also carry such name. This term was at no point just an ordinary designation of a tribe, it was in its very essence the synonym for the worship of (a) mysterious 'G-th(s)' and to a strong degree of a worship of self by those carrying this name based on ancestry and their features as tall, blonde and blue-eyed Arians:

Who Were The 'Goths'?	The Goths were warriors also known as Barbarians, who most probably originated in a yet small group in Götaland (also Gothia / Gothland / Gothenland; Southern part of Sweden), where we still find today the city of Gothenburg. 	While many groups / scholars try to question this precise origin (probably based on religious reasons and / or in order to distract from a rather painful history related to their invasions), there is one anecdote which clearly affirms the Goths descending from Scandinavia: In 1434 AD, at the catholic Council of Basel / Florence, a serious dispute arose between the Swedish delegation, which claimed that their Goths successfully invaded the Roman Empire, and the Spanish delegation which on the other claimed that only the most heroic Goths had left Sweden and are now part of their land. This episode unquestionably proves what many voices try to suppress, that the Goths mainly originated from Götaland.	Wikipedia.org /Goths #Legacy
	Royal titles in Sweden further affirm(ed) the Goths having originated in (and later subjugated by) modern Sweden: In 1278, when Magnus III of Sweden ascended to the throne, a reference to Gothic origins was included in the title of the king of Sweden: 'We N.N. by the Grace of G-d King of the Swedes, the Goths and the Vends'. 	A look at the physical appearance eliminates any remaining doubt: *"In ancient sources, the Goths are always described as tall and athletic, with light skin, blonde hair and blue eyes. The 4th-century Greek historian Eunapius described their characteristic powerful musculature in a pejorative way: 'Their bodies provoked contempt in all who saw them, for they were far too big and far too heavy for their feet to carry them'."*	Wikipedia.org /Goths #Physical Appearance
	Jerome (secretary to the Roman Catholic pope Damasus) was (correctly) opposed by two members (probably church officials) of the Gothic church, Sunnias and Fretela, for having manipulated the Bible. He addressed those two in his letter as 'Germans': *"Who would believe that the barbarous language of the Goths would try to compete with the Hebrew in establishing the true text of the Scriptures, and that, while the Greeks are indolent and contentious, even Germany would scrutinize the words of the Holy Spirit?"* But it is not clear which share of all the Goths he considered Germans.	The Journal of English and Germanic Philology (probably a Jesuit site, discernment required!)
	It is certainly worth noting, although this adds another line of thought but ultimately connects the dots, that the German national football team has still today the nickname 'Die Germanen / Los Teutones)' in the Italian / Spanish language (a term hidden from the English and German Wikipedia entries!), and this nickname is still widely used in the media today. According to Roman sources, the Teutons (Latin Teutones or Teutoni, Ancient Greek TEYTONEC) were a Germanic people of antiquity who originally lived in present-day Jutland. Jutland is 'sandwiched' between modern Germany and Götaland. In 750-500 BC, it is estimated that 90% of Germanic peoples were of Swedish (Götaland) origin, with the remainder being Teutones (Jutland) and Vandali. The Germanic name has also the same roots as that of the Goths.		Jutland (green), 'sandwiched' between modern Germany and Götaland. 	The Goths worshipped a G-d of War (among many other g-ds).	
	The term 'Barritus' (= 'shield-song'; from Old Norse 'bardi' = shield, or 'beard-way' - the humming in the beard) describes a battle cry (combination of a shout and dance step) which was first documented in the 1c. AD (of Gothic / Germanic origin). Soon after Roman emperors employed in the 4th and 5th c. AD auxiliary troops constituted of warriors with Gothic / Germanic background (called 'Cornuti' which means 'the horned ones', with its twin unit 'Brachiati' see modern use 'brachial'), then this war cry became even the standard for the Roman Army to initiate the battle (now reduced to the shout, without dance step). Important to know is that this war cry imitated the voice of the god 'Th*r'. The Roman historian Tacticus linked this war cry to Her**les - once again associated with the god 'Th*r'. 	Some Anglican churches in England still hold today so-called 'Goth eucharistic gatherings' in the form of a biweekly service in the evenings for people who identify themselves as Goth. *"The service is candlelit with a specially written liturgy and uses a variety of modern rock and as well as classical music. The structure of the service revolves around the baptismal candle and reflects a serious engagement with the depressing and darker sides of our lives before moving towards a position of hope and happiness found in the empathy of the Lord Jesus Christ."*	Curiouschristian.blog/2006/01/28 /Goth-Eucharist/ Fitforfaith.ca /Discernment-Cults-Religions/ #Anglican
	The cult of Pentecostalism was from its very inception deeply connected to Gothic elements. The Albury Park near London, which was the original meeting place of the founders-, and the ground zero for Pentecostalism, was heavily remodeled (existing buildings) and designed (new buildings) in the Gothic style. The 1901 Topeka Revival in the US, which directly led to the rise of Modern Pentecostalism, took place at the Stone's Folly, which was a Gothic-styled mansion that became a brothel and burned down, all within less than 12 months after the revival. 	For the highly problematic Catholic teacher J.R.R. Tolkien, Gothic was the first language that he studied for his own pleasure, which in turn motivated him to invent 12 own languages while propelling the consequences of the Tower of Babel even further. He even signed as Ruginwaldus Dwalakōneis (gothicized 'Ronald Tolkien') and included Gothic names, elements and language in his works. 	Freemasonry occasionally uses the term 'Gothia' in our day and age. Both the 'Corps Gothia in Innsbruck' and the 'Berlin Fraternity Gothia' (original 'Berliner Burschenschaft Gothia') draw their names from the historical Germanic tribe of the Goths. After the term was in the early 19th century romanticized by the early German student and nationalist movements, fraternities used it to symbolize a unified cultural identity, a sense of deep Germanic heritage, and romantic nationalism. When the 'Berlin Fraternity Gothia' was established in 1877, it adopted 'Gothia' as an identifying moniker in this same tradition, for an ideological and historical namesake common among several German and Austrian student organizations. How Became The Name ' G-d ' Common Use In The World Today?

The name 'G-d'was originally an appropriation for the use in Arianism, and is today extensively being used by religions who translate the name of their deity in English with 'G-d'.

The Gothic Bible itself was the basis for spreading the name of 'G-d', as described in the book 'Ulfilas, Apostle to the Goths, page 137': *"Such was the gift that Ulfilas gave to his people, and to all the folk who used the same tongue [...] doing everything that the book might come to them in no strange garb, but might become readily familiar and be truly a national possession. That they regarded it as such for many generations after his death we know. Goths and Vandals alike carried it with them on their 'wanderings' through Europe.*

Whether in simple piety or in the superstitious hope of reading the future on the chance appointed page, it was consulted on the battle-fields of Gaul before the fight began. In Italy it was diligently compared with the Latin authorities, and notes were made of the discrepancies. To Spain the Vandals carried it before the Goths, and in their hands it crossed to Africa and even came round again to Rome when Geiseric tried to win where Hannibal had failed. [...]

Though it has laid buried for so many centuries, it is none the less the foundation-stone of all Teutonic literature."

Therefore, the greatest contribution to its spread had been the military invasions of the Roman Empire through the different (sub-) groups of the Goths:

Ulfilas, Apostle to the Goths, page 137

By Bukkia - On the basis of File:Europe 526.jpg, which is a part of a map from the map collection of the Perry-Castañeda Library (PCL) of the University of Texas at Austin, Public Domain

Wulfilas (~310-380 AD) close association with the rising Roman Catholic Church (313 AD onwards) was also a main driver for the spread of the name 'G-d'.

The book 'Ulfilas, Apostle of the Goths' clearly affirms this close linkage, contrary to the notion which is usually employed today, that Roman Catholicism was totally opposed to 'Gothic Christians' with their Arianism: *"... there can be no doubt that the orthodox opinion was that the Gothic Christians who suffered at this time were not Arians but Catholics. Thus Augustine, referring to this persecution* [of the Goths from 370-375 AD]*, distinctly claims its victims as Catholic martyrs; and so strongly emphasizes the fact that none but Catholics were exposed to it, giving as his authority 'certain brethren who had been present there as boys', and were eyewitnesses of their sufferings, that he even appears to be controverting a different opinion. Thus Theodoret also speaks of the Goths as having been brought up in 'the teaching of the Apostles'. Jerome would never 'have alluded to them in such an unqualified way if he had had any inkling of unorthodoxy in their Church. Nor would Basil* [of Caesarea] *have received so gratefully the relics of an Arian martyr. And, not to multiply the indication of this opinion, Ambrose* [RCC doctor]*, in the commentary on Luke, mentions the Gothic martyrs in direct distinction to those who tolerated even the discussion of the Arian doctrines."*

Ulfilas, Apostle to the Goths, page 72 (92)

But it has to be noted that the Roman Catholic church later predominantly used 'D*us' as the name of their deity, as reflected today not only in Latin, but also in French, Italian, Portuguese, Romanian and Spanish (see above). We have no exact knowledge where this shift occurred at a certain time period, in which sequence and region, but we can conclude that the change from 'G-d' to 'D*us' happened simultaneously to the change of the official church language from Gothic (and in other parts from Greek) to Latin, after the Old Latin Bible (written sometime before 380 AD) and Jerome's Vulgate (405 AD) had already included the name 'D*us'.

One decisive factor was certainly also the use of Gothic as church language until Latin replaced it in Europe.

In Spain, which has a significant history related to the Goths (especially in Catalunya and in general amongst Spanish nobility), the Gothic language was used as church language until the Visigoths converted to Catholicism in 589 AD (the same year they burned all Arian literature in Spain). The Gothic language then survived as a domestic language in the Iberian peninsula (modern Spain and Portugal) as late as the 8th century.

The Visi-Goths also built many churches in Hispania, some of which are still in existence today.

What About The Term 'G-spel' ?

Comments	References
The word 'G-spel' is **composed of the word 'Goth' (see above) and 'Spell'**! It was glossed 'g-dspel' in the Old English era and the letter 'd' dropped out easily in speech. *"From Old English the word passed, in adapted forms, into the languages of the Germanic peoples evangelized from England: Old Saxon 'g-dspell', Old High German 'g-t-spell', Old Norse 'guð-, g-ðspiall'; in each case the form of the first element shows unequivocally that it was identified with G-d, not with good [as often argued]."*	OED.com /Dictionary /Gospel

It is a mystery why the English translation deviated from other languages in such a dramatic and heretical way, and why not simply the **term 'Evangelium'** is being used in the English language, which would go hand-in-hand with the use e.g. of the **term 'Evangelist'**. What About The Name 'Jesus'?

IESOUS (Ἰησοῦς, pronounced YAY-soos) is the holy name in Koine Greek (likely a transliteration from the Hebrew name 'Yeshua'*). It was used as the standard and reverent name in the Greek-speaking world since at least the 3rd century BC, and most importantly used as such in both the Greek Old and New Testament, and also in Christian writings well into the 4th century AD and thereafter. Important to note is that **His name was used with high reverence** and not as a **profane exclamation as today**.

405 - 1611 AD	1st manipulation of the divine name by the **Roman Catholic Church**, through **Jerome**. He removed in his Latin translation one letter, and now used **'Iesus'** for the divine name of 'IESOUS'. This modified designation was later also used in English and 'Iesus' was printed until the King Iames Bible 1611.	
~1524 AD	**Creation of the letter 'J' by Gian Giorgio Trissino, Papal Ambassador to Venice**. He was the first to explicitly distinguish 'I' and 'J' as representing separate sounds, specifically in his 'Epistola Del Trissino De Le Lettere Nuωvamente Aggiunte Ne La Lingua Italiana' (= Trissino's Epistle About The Letters Recently Added In The Italian language) from 1524. Trissino is also known for having **disinherited his son, archpriest Gulio, for his ingratitude to the popes** and for siding with the Reformers.	[1] [2]
-	Very soon after the name 'Jesus' came into use, and following the development of English profanity in the Middle English period from 1066-1500, it was quickly being **used as a swear word**, in a way **'IESOUS' never was**. While the name **'IESOUS' must almost necessarily be spoken with a soft and deliberate tone and was entirely for sacred purposes**, the modern name of 'Jesus' is very commonly used **in Western culture as a 'mild oath' or expletive / profanity to express anger, frustration or surprise**. Through this relatively modern and highly problematic phenomenon, we can clearly see that **the modern name 'Jesus' does not carry the mark of divine authority**. Similarly, we could hardly imagine a verbal abuse of the soft-sounding name of 'THEOS', but we all know very well how the name 'G-d' is (ab)used in every possible way, religion, and in atheism.	
1611 AD	The first edition of the King James Bible (1611) still used **'Iesus'**, the Latin form of IESOUS.	
1629 AD	2nd manipulation of the divine name. The **KJV Bible** revised in 1629, was the first English book in history to use the letter 'J' at all, and immediately used it for the divine name of **'Jesus' and 'Jeh*vah'**.	

** The Hebrew name 'Yeshua' is not to be confused with the Hebrew 'Y*shu', which has been used in some Jewish literature and traditions as a polemical or derogatory term for IESOUS. Many sources, particularly within Jewish and Messianic scholarship, note that 'Y*shu' is interpreted as an acronym for the Hebrew phrase 'Yimmach Shemo Ve-Zichro', which translates to **"May his name and memory be blotted out"**.*

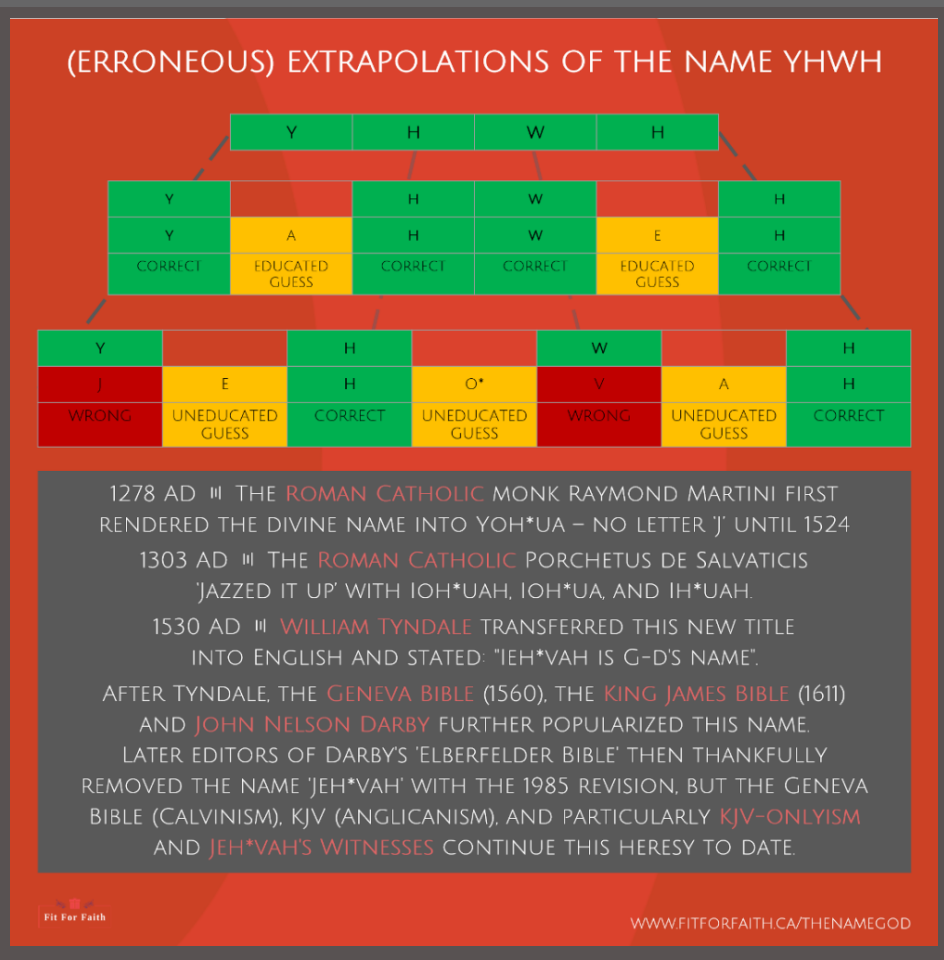

*Among Orthodox Jewish communities, the name 'Y*shu' is still used to intentionally avoid mentioning the name associated with salvation. The popular Talmud contains several references to 'Y*shu', a word generally reserved for 'Jesus of Nazareth', often in a pejorative context. Passages such as **Sanhedrin 43a, 107b and Sotah 47a describe a 'Y*shu' who practiced sorcery, enticed Israel to apostasy, and was executed on Passover**. Those passages were omitted from later censored editions of the Talmud.*

This shows us what difference one single letter can make, and that even a supposedly small difference between 'IESOUS', 'Iesus' and 'Jesus' is not legit.

What About The Name 'Jeh*vah'?

Not only does the King James Only Movement propagate the name 'Jeh*vah' through its Bible and in thousands of sermons held every week - there actually developed a whole religion with this particular name at its center. But is it legit or rather an imaginative prose?

1278 AD	The **Roman Catholic** monk / Spanish Dominican friar Raymond Martini first rendered the divine name into **'Jeh*vah' (Yoh*ua - the letter 'J' would not exist until 1524)** in his book **'Pugio Fidei' (The Dagger of Faith)**. He combined the consonants IHVH (I standing for J, V for W) with the vowels eoa of the substitute word Adonai. It is important to know that Raymond was also accused of **forgery** and wrote two **anti-Jewish books**. These facts alone undermine any credibility and authority of this person, and thus also the legitimacy of this supposedly "divine" name.	[1] [2] **note that the English Wikipedia articles have excluded this information, while the German articles include those facts.*
1303 AD	**Porchetus de Salvaticis**, also a **Roman Catholic** monk and also known for his **anti-Semitic writings**, continued to facilitate this new tradition through his work 'Victoria Porcheti adversus impios Hebraeos' (Porchetus's Victory Against the Ungodly Hebrews), which heavily relied on and copied material from the Pugio Fidei. In this work, he spelled the divine name in various forms such as **Ioh*uah, Ioh*ua, and Ih*uah**.	[1]
1518 AD	**Pietro Colonna Galatino**, a **Franciscan friar and 'Christian' Kabbalist** who died in the Papal States, is sometimes referred to as the 'inventor' of the Latinized term and pronunciation Jeh*vah, by blending the Tetragrammaton 'YHWH' with the vowels of 'Adonai'. But he simply popularized the name 'Jeh*vah' in Christian literature, in continuation with the 'creative' work of Raymond Martini, and after he borrowed heavily from the Pugio Fidei when writing his own major work, 'De Arcanis Catholicae Veritatis' (On the Secrets of Catholic Truth).	[1]
1530 AD	**William Tyndale** then transferred this new title into English. In the preface to the 1530 edition of the Pentateuch, Tyndale noted: ***"Ieh*vah is G-d's name... as oft as thou seeist LORD in great letters... it is in Hebrew Ieh*vah"***. While 1530 was the first appearance, the spelling varied slightly in later 16th-century works, with 'Jeh*vah' becoming more established in the following decades, after Gian Giorgio Trissino had invented in 1524 the letter 'J' (see also below his influence on the name 'Jesus').	[1]
-	Following Tyndale, the **Geneva Bible (1560)**, the **King James Bible (1611)** and highly problematic teachers like **John Nelson Darby** further popularized this name. Later editors of Darby's 'Elberfelder Bible' then thankfully **removed the name 'Jeh*vah' with the 1985 revision**, but the **Geneva Bible (Calvinism)**, **KJV (Anglicanism)**, and particularly **KJV-onlyism** and **Jeh*vah's Witnesses** continue this heresy to date.	

What About The Name 'YHWH'?

We simply do not know, nor will ever know, how to pronounce this name, because the Hebrews failed to transfer this knowledge throughout the generations.

If it would be relevant for the New Covenant church, then THEOS would have made sure to transfer this name throughout history. Instead He gave us not only the entire Bible in the Greek language, but also all the divine names in that language.

What Name Has Been Delivered To Us?

THEOS / KYRIOS gave Himself many names and often adjectives in the biblical context, but this beautiful and descriptive variety does not generate an allowance for humans to add a name completely foreign to the Bible, such as the one seen above. If we would (retroactively) grant this allowance to Wulfila, we would have to grant it in theory to any spiritual leader of our present day or future.	Fitforfaith.ca /Studies /#Trinity
We would also never imagine changing the name of IESOUS CHRISTOS to an artificial word we find more suitable. Mat 1:16 reads *"of Mary, from out of whom was born IESOUS, the One being called CHRISTOS."* Greek "... ΜΑΡΙΑC, ΕΞ ΗC ΕΓΕΝΝΗΘΗ ΙΗCΟΥC [IESOUS] Ο ΛΕΓΟΜΕΝΟC ΧΡΙCΤΟC [CHRISTOS]"	
His name is predominantly · 'THEOS' (Strong's Greek G2316; 3121x Old Testament + 1313x New Testament = 4434 occurrences including the use for 'gods') and · 'KYPIOC' (Strong's G2962; 7350x Old Testament + 721x New Testament = 8071 references including the vocative use as 'Sir'; usually translated with 'Lord', 'Master') and I urge the church to go back to His name (as we do not know with certainty how to pronounce nor to write the Tetragrammaton, except to simply write it as YHWH). Greek is the world's oldest recorded living language, first spoken in the Balkan peninsula since the 3rd millenium BC or earlier (which can only mean that Greek was one of the languages with the Tower of Babel in ~2841 BC (line of Japeth)). The Greek alphabet is also the oldest written alphabet still in continuous use today (at least since 800 BC) and is the first writing system to have included vowels. The earliest examples of written Paleo-Hebrew date only back to the 10th century BC and the Hebrew of today's Bibles has little to do with Paleo-Hebrew and the Aramaic / Hebrew of the original Bible). · ~550 AD ||| The Madaba Map, including several mentions of 'THEOS' and 'KYRIOS' in its Greek original (Remarkably located in modern Jordan!) The Greek Old and New Testament is the Scripture delivered to us, and although not considered as such by most mainstream scholars, divinely inspired (as unquestionably proven in the study 'Septuagint ||| Biblical Proof for Superiority over Masoretic Texts' and especially through hundreds of NT quotations quoting -predominantly- the Greek OT. If IESOUS quoted it, it is divine!). The Greek OT was predominantly used as source-, translation- and church text from the 3/2c. BC until the early 5c. AD, when the first Roman Pope (Damasus) had ordered his secretary Jerome to create a new translation which was the first to use the Proto-Masoretic / Modern Hebrew text as basis and broke with ~6-7 centuries of Greek tradition. This Greek OT & NT now contains absolutely everything we need, including His holy name we have no justifiable reason for to translate.	Fitforfaith.ca /Bible /#Septuagint
The name 'THEOS' can be easily spoken in any language, but has to our surprise not even a Wikipedia article (!!) and is today rather (ab)used for restaurants and male names. Where have we gone?	Google.com //search?q=theos

Epilogue

I finish with a simple question:
Are you firm enough to worship His true name,
even it sounds unusual to your church, family, neighbors and nation?
